ANIMALS

We see various animals around us. Some animals are kept in our home as pets. They are called domestic animals. Some animals live in jungle. They are called wild animals. We can see many domestic and wild animals in the zoo.

Animals are different in shape and size. Some are big and some are small. They have four legs and a tail. Some animals have horns to protect themselves.

Animals need food and shelter to live. Some animals eat plants while some eat other animals to survive. The shelter of animals have different names. Animals help us in many ways.

Go through the book and you will know more about the animals.

Note : The content and the practice lessons are organised in such a way that a student can learn to (a) identify and name the pictures and words (b) write the words, and (c) learn in detail the above topic. If users are creative and innovative, this material is useful for teaching many concepts.

A note to the teachers

Special Education for children with mental retardation has seen tremendous progress in recent years. Teaching functional academics, literacy and numeracy are important areas requiring focus. A systematic approach to teaching functional literacy and functional numeracy will let the teachers and the students have a sense of achievement and eventually the students gain independence in social competence.

Considering the need for methods and materials for this purpose, an attempt is made to develop learning aids, workbooks and charts and resource book for teaching functional literacy and numeracy which includes reading, basic arithmetic, time and money concepts.

*A field trial was conducted to test the efficacy of the materials with children in special schools. Infact, decision on “**what to develop**” was made only after compiling the opinions of special teachers.*

The materials developed are presented along with a catalogue describing the multiutility of each material.

The printed matter is in the form of literacy and numeracy series. This book is a part of the series.

Teacher's own creativity and imagination will further enhance the teaching - learning process. A feedback from the teachers is most welcome for further refining of the materials.
