# NATIONAL INSTITUTE FOR THE MENTALLY HANDICAPPED, SECUNDERABAD DEPARTMENT OF SPECIAL EDUCATION 

## FUNCTIONAL ASSESSMENT CHECKLIST FOR PROGRAMMING (GUIDELINES FOR USING THE CHECKLIST)

The trend in special educational assessment and programming has changed from IQ based grouping to functional level based grouping without compromising on age appropriate programming. Any educational assessment tool should ideally lead to appropriate programming for the child. It should also provide inbuilt periodic evaluation facility for monitoring progress and modifying programme. The tool also should provide for qualitative and quantitative measurement of the child's progress. It should also help in homogeneously grouping children and provide for promotion of children objectively to next level. The items listed in the tool should be such that they are (1) easy to understand, (2) activities necessary for daily living, (3) easily observable, (4) age appropriate as far as possible, (5) ultimately contribute to living competently in the society.

Often times the special teachers have expressed that maintaining detailed assessment and programming records of each mentally retarded child is time consuming. In addition, many efficient special teachers find it difficult to write lengthy records due to their poor ability to express in English. Many schools do accept writing in local language or Hindi, which poses problem to other teachers who do not know these languages. With the intention to find solution to this situation and to provide for easy assessment and recording procedures the Department of Special Education at NIMH has developed educational assessment checklists for children from preprimary to prevocational levels.

## Grouping of students

Grouping is done based on the ability and chronological age into different levels such as Preprimary, Primary-I, Primary- II, Secondary, Prevocational-I, Prevocational-II, and Care group. The details are given below.

## Preprimary:

This group consists of children between 3-6 years of age. The coverage of content in the areas of personal, social, and academic is more than with occupational area in this level.

## Primary-I:

Students who achieve $80 \%$ of the items in preprimary checklist are promoted to Primary-I level and the age of the students entering in this class may be 7 years approximately. In some cases the students may continue one more year in Preprimary to fulfil the pass criteria (For example, if a student who is 7 years has achieved about $60 \%$ on evaluation in primary checklist he may continue in the same class for a longer time and see whether he/she can achieve the said pass criteria, ie., $80 \%$ ).

## Primary-II:

The students who do not achieve $80 \%$ of the items in the checklist in Preprimary level even after 8 years of age are placed in Primary-II. The content in the academic area is minimal for this group. This group covers children from 8-14 years. When they achieve $80 \%$ of the items in the Primary-II checklist they are promoted to Prevocational-II. In some cases they may achieye $80 \%$ before the age of 14 years and may be promoted to Secondary group.

## Secondary group:

This group includes students between 11-14 years. It is a mixed group (ie., students promoted from both Primary I \& II). Students on achieving $80 \%$ of the items in this class including the items in academic area will be promoted to Prevocational-I and those with inappropriate items excluded in academic area will be promoted to Prevocational-II.

## Prevocational-I \& II:

Both the groups consist of students in the age group 15-18 years. The primary focus of training is on preparing students in basic work skills amd domestic activities. Hence the major content covered in the checklist are in the areas of occupational, social, and academics. However, the content coverage under academic area will be minimal or need based for Prevocational-II group of students.

Mentally retarded persons over 18 years will be sent to vocational training units with their summative evaluation reports for further programming. This curriculum chaecklist does not cover the vocational area.

## Care group:

This group includes children with very low ability (bed ridden-profoundly retarded) and the items in the checklist focus on trianing them in performing partially, the basic skills such as drinking, eating, toileting, and basic meaningful motor movements and communication. If they continue to stay nonambulatory as the age advances, the parent/ caretaker may find it difficult to bring the child to school. In such cases, simultaneously preparation of caretaker for maintaining learned skills is necessary. It is good to have the children of this group distributed one each in each class starting from prevocational group. This would provide a stimulating environment for them. However, they should be assessed using care group checklist, irrespective of in which group they are placed.

Note: 1. The checklists are pinned groupwise so that the respective class teacher can have the checklist relevant to the group she/he teaches. Remove the clip and separate the checklists of each group to use by the class teacher.
2. A Progress report is provided along with the checklists to record progress and send to parents periodically. Ideally, have the term evaluation done before the vacations and send progress reports home with the children for parents' information.
3. A Brief teaching plan of activities can be written every term for each child in the programme planning sheet like the one provided at the end of the guidelines.

Promotion procedure

## Care Group

Separate group for nonambulatory children with profound retardation

Preparation of caretaker for maintaining skills

## Content of the checklists

As the child's interaction in the society gradually expands from self to immediate family, neighbourhood and community at large, the areas to be trained are grouped under the following headings/ or areas or domains: Personal, Social, Academic, Occupational and Recreational. As far as possible, all the items listed are activity based so that setting teaching goals and evaluation are easy. The terms such as Self-help, Social, Communication, Motor are avoided and each item is listed is an activity. This is because, an activity cuts across more than one skill area. For instance, "Feeds self" includes motor skill, self-help skill, communication (asking for more/less) and social skill. Further an activity is easier to observe and measure the progress in each item leads to compentency in that given area. As the sequencing of items proceeds from self needs to family and ultimately the larger community the ultimate aim of special education - the social competency in living in community independently will be achieved. Though the items are a continuuum of activities, the checklist is divided in such a way as to suit the chronological age of the students and they provide for easy grouping of the students.

## Format

The format is so designed that the programmer can enter assessment information (entry level) and the progress periodically (at every quarter) for about three academic years, as it is assumed that a student stays a maximum of 3 years in a given level. Further, the codes to grade the performance level of students on initial assessment and periodic evaluation are given. The details are seen under the head 'Using the checklist'. At the end a table is given to note the progress of individual child in all the areas periodically after evaluation which may be transferred directly on to a progress report.

## Individualizing within the group checklist

Under each area space for a minimum of 8 items is left for programmers to include any activities which may be essential for an individual student (The space left does not restrict to only 8 items. It could be more or less depending on the need and utility of the items for a given student). Add those items and enter performance level. In coding, NA is given to mark items which are not applicable to certain children, eg. 'running' for a diplegic CP child. Items marked NA should be deleted while totalling item in that section. Thus, items for each child can be specifically added or deleted and accordingy number of items in each domain modified.

## Using the checklist

Read each item carefully, and from the performance scale given below, select the Code, which best describes the student's present level of performance. Record your answer in the appropriate place. Yes ( + ) means the child cail perform the item with no help. Occasional Cueing ( C ) means, the child needs to be given clues which require 'thinking' by the child to perform the given task. For example, to wash hands and face "look at your hands", "are they clean", "what should you do" and so on. For the same item, Verbal Prompting (VP) will be, telling the trainee, "rinse hands", "pick up soap", "apply" and so on. Physical Prompting (PP) for this item will be physically helping the child to rinse hands, helping to apply soap and so on. No (-) would mean, one has to completely do the task for the child. Not Applicable (NA) refers to the non suitability of the item to the child. No Exposure (NE) means, lack of opportunity to learn. Recreational items are to be graded as given in the checklists.

## Frequency of assessment and evaluation

1. Ideally on admission, each child should be assessed and the data should be recorded as entry level in each of the items.
2. The checklist provides for periodic evaluation. Generally teaching goals and objectives are set quarterly (once in 3 months) and the progress is evaluated at the end of each quarter. As it is assumed that a child stays for a maximum of 3 years in a given level the checklist provides space for recording assessment and evaluation data over a period of 3 years.

## Scoring

Items marked 'Yes' (or + ) are counted as a point, while the others such as PP, VP, NE are noted but not counted for points. As the ultimate aim is that of achieving independence in a given activity area, those activities the child performs independently or with occasional Cueing only will be considered for quantifying into scores. The items marked NA are deleted from the total items to be-learned while calculating percentage. Similarly, specific items added should be included
for calculating percentage. Achievement of $80 \%$ of items in the checklist will be considered for promotion from one level to the next higher level. For example, the children who achieve $80 \%$ of the items in preprimary checklist will be promoted to the primary level.

Further, there may be occasions where a child may not meet the criteria even after three years. Find out in which specific areas he has problem and what it is due to such as motor impairment or inability to learn academics due to his relatively lower mental ability. Seeing to the suitability of the item to the given child the teacher may use her judgement to delete the item while calculating $80 \%$ pass criteria. It is however, cautioned here that poor teaching should not reflect on the child's lack of progress or inability to learn.

## Scoring Recreational Activities

The items listed under recreation need not be counted for quantification and promotion as these items are interest based. The grades as noted below illustrate the involvement of recreational activities in the child. The cumulative score on the last page can be the grade that is obtained maximum among the recreational items. If more than one grading gets equal scores, the teacher may use her judgement and decide.

A $=$ Takes initiative and participates effectively.
B $=$ Participates when others initiates.
C $=$ Involves self but not aware of rules.
$\mathrm{D}=$ Observes with interest.
$\mathrm{E}=\mathrm{Not}$ interested (Indifferent). NE - No Exposure

## Writing progress report

Teachers can report the progress of students both qualitatively and quantitatively using this assessment tool. The codes they use in noting the progress of students on the assessment checklist guides teachers in writing a qualitative report and the table provided at the end of the checklist in writing quantitative report.

If a student achieves $80 \%$ of the activity he will be considered to have pass in that particular activity. As described in the level of performance, if a child gets the score ' C ' (occasional cues) in a particular activity, it may be the pass criteria of that particular activity and the strengthening of that particular activity will be continued in the next level. The teacher may mention those items which need to be strengthened in the progress report.

It is seen that the system followed here is very close to the regular school system where the children's progress is periodically monitored, quantified and promotions or detentions made very objectively. To promote normalization and mainstreaming such an approach of assessment leading to programming, is envisaged. Further, the class grouping are named as preprimary, primary, secondary and prevocational to match the regular education nomenclature.

As each item in the chekclist is an activity by itself it reduces the burden of formulating objectives for teaching. Whatever may be the skill domain, if a teacher plans all her curricula based on activities the teaching becomes more function oriented and meaningful. The Department of Special Education is in the process of developing handbooks for teaching the listed activities for each level which, it is hoped will further assist the teachers in effective teaching. It is also observed that the mentally retarded children do exhibit certain challenging behaviours, which become the responsibility of the teacher to manage the behaviours in the class room. While reporting on development of social competencies, the teacher may write precisely the description of challenging behaviour, when it occurs, for how long it is exhibited and/or how frequently it occcurs. With effective classroom management the behaviours are bound to come down and the teacher may report that descriptively during each of the quarterly review.

## Acknowledgements

We, the Staff of Department of Special Education, NIMH place on record our sincere thanks to Special teachers and Principals of Special Schools - Manokrishi, Hyderabad; Nirmala Sadan, Muwattupuzha; I.E.L.C. School and Home for the Mentally Retarded, North Arcot and Vidya Vikasini Opportunity School, Coimbatore for their comments and suggestions after using the checklists which helped in evaluating objectively and revising the functional assessment checklists. We thank specially the teachers in Karavalamban Kendra (Special Education Centre) who were invölved in field testing and revision of the checklists. Our thanks are also due to Director, NIMH for his encouragement and support in undertaking this work.

17. Tells which set has more/less quantity.
18. Points to containers with either solids/liquids to show full and empty.
19. Tells when a container is shown either full or empty with or without liquid or solid.
20. Rote counts upto 5 .
21. Counts and gives objects upto 5 when not asked sequentially.
22. Counts and gives objects upto 10 when not asked sequentially.
23. Shows a numeral and places value when not asked sequentially.
24. Names upto 5 numbers when not asked sequentially.
25. Writes numerals upto 5 in a sequence.
26. Writes numerals upto 5 when given dictation not sequentially.
27. Points to alphabets (English/regional language) on a chart not asked sequentially ( 3 letter words in case of sight word teaching).
28. Names alphabets when asked not sequentially (3 letter words in case of sight word teaching).
29. Writes alphabets when given dictation (3 letter words in case of sight word teaching).
30. Identifies a clock or wrist watch.
31. Tells/points to when asked the use of clock or wrist watch.
32. Dilferentiates money from other objects.
33. Tells/points to when asked the use of money.
34. Groups Rs.1, 2, 5 notes when given.
35. Gives $1,2,5$ rupee notes when asked.
36. Points/tells when asked by showing Rs.1, 2,5 notes.
37. Geunts and gives 1 rupee notes upto Rs. 5 when asked.
38. Points to atleast 5 pictures of animals when asked.
39. Names atleast 5 animals when shown pictures.
40. Points to atleast 5 pictures of fruits when asked.
41. Names atleast 5 fruits when shown pictures.
42. Tells/points to the clothes (frock, shorts, shirt, T-shirt)he/she wears when asked.
43. Uses words or gestures for 'now and later' when necessary.

## Academic

1. Reads alphabets (English or any other regional language) when shown a chart/book. (Words incase of sight word teaching).
2. Reads words (vegetables, fruits, furniture, animals) seeing a picture.
3. Reads 2-3 letter words without a clue (picture) (about 10).
4. Reads his name.
5. Reads his friend's names in his class.
6. Reads four sign boards which are essential for independent mobility.
7. Writes his name.
8. Writes names of words (vegetables, fruits, animals, furniture, clothes).
9. Tells functions of sense organs.
10. Counts and gives objects upto 10 when not asked sequentially.
11. Shows a numeral when not asked sequentially upto 10 .
12. Names numbers upto 10 when not asked sequentially.
13. Writes numerals upto 10 when given dictation randomly.
14. Writes numerals upto 10 in a logical sequence.
15. Writes missing numbers before and after upto 10.
16. Does simple addition within 10 with objects (without paper).

## S.No.

## Activity

17. Does simple addition within 10 on paper using slash marks.
18. Gives exact number of objects when asked upto 20.
19. Expands the numbers from $11-20$ (Eg. $11=10 \& 1$ ).
20. Points to numerals upto 20 when not asked sequentially.
21. Names numbers upto 20 when not asked sequentially.
22. Writes numerals upto 20 when given dictation.
23. Writes numerals upto 20 in a sequence.
24. Writes missing numbers after and before upto 20.
25. Counts in tens upto $100(10,20,30, \ldots . .100)$.
26. Groups in tens to make $20,30, . .100$.
27. Associates time with daily activities.
28. Tells/shows on a calendar/chart the name of the day when asked what day is today, what day will be tomorrow and what day was yesterday.
29. Tells/gestures in order what he does from morning till he goes to bed.
30. Tells his age/points to self when asked who is
31. Tells/gestures the number of days in a week.
32. Tells the number of months in a year.
33. Indicates the date on the calender.
34. Changes the date and month on a calender stand correctly.
35. Tells the position of long and short hand on a clock when asked.
36. Shows on a clock time in hours when asked.
37. Tells time in hours seeing a clock/wrist watch.
38. Shows on a clock the time in half hours (7.30, 8.30).
39. Tells time in half hour $(4.30,5.30)$ seeing a clock/wrist watch.
40. Gets ready to come to school in time.
41. Identifies coins ( 1 rupee, $50 \mathrm{p}, 25 \mathrm{p}, 10 \mathrm{p}, 5 \mathrm{p}$ ).
42. Tells names of coins.
43. Identifies rupee notes (Rs.1, 2 upto 10).

## Activity

44. Counts 1 rupee notes to give a sum of Rs.8, 10, 15, 20, etc.
45. Groups Rs. 10 notes to give 20, 30, 40, ..... 100.
46. Gives change to Rs. 10 using 5 rupee notes $(5+5)$.
47. Gives change to Rs. 10, 20, 50 using a combination of Rs. 5 \& Rs. 10 notes.
48. Tells names of rupee notes.
49. Tells how many cups/glasses of water, rice/dall are required to fill a given utensil.
50. Measure the required cups of water for making tea.
51. Posts letter in the post box.
52. Tells his parents/family members when he feels sick.
53. Identifies the various means of transport (cycle, auto, cycle rikshaw, bus, car, lorry, aeroplane, train).
54. Names various means of transport.
55. Gets in and gets down from the desired bus when bus stops in the bus stop.
56. 
57. 
58. 
59. 
60. 
61. 
62. 
63. 

## Occupational

1. Dusts with a duster cloth the furniture and the other items in the house.
2. Sorts out vegetales and places them in respective container/ baskets/ in a fridge.
3. Places plates and glass suitably on the dining table/floor for breakfast/ lunch/dinner, when told.
4. Washes plates and glasses after eating food/snacks.
5. Peels vegetables such as beans, onions, boiled potatoes, peas, etc. where knife / scrapper are not used.

## S.No.

## Activity

6. Carries water in a small bucket from the tap or when required/ asked by family members.
7. Stacks utensils in the kitchen after washing.
8. Serves plates with snacks/food to family members.
9. Separates leaves in the leafy vegetables.
